JIDC approaches its fifth birthday

Salvatore Rubino, Editor-in-Chief, JIDC

(Received and Accepted 10 January 2012)

The Journal of Infection in Developing Countries (JIDC) is approaching a significant milestone – the fifth anniversary of publishing our first issue in August 2007. Since posting that first issue online, JIDC has grown continuously and realized several important accomplishments. As a result of receiving an enthusiastic reception from the scientific community and the subsequent increase in submissions, we quickly moved from being a bimonthly to a monthly publication and were listed in several key databases including ISI Web of Knowledge (Science Citation Index Expanded), Index Copernicus, Chemical Abstracts, CABI Global Health, CAB Abstracts, Directory of Open Access Journals, CrossRef/DOI, HINARI (WHO), Ulrich's Periodicals Directory, Google Scholar, NLM Catalog, IMBIOMED, BOAI, WAME, COPE, DIS-UFS(PR), GFMER(CH), IBT-CCG-UNAM(MX), WMA(ES), WB-LUMC(NL), LC(FR), BVUB(BEL), GU-L(US), L-YU(CA), HKUL(HK), RCL-UR (US), B-UNIFACS (BR), EBSCO. Then in August 2009, we were thrilled to be accepted into the distinguished PubMed database.

Our next goal is to receive an impact factor, and in a few months we will receive our impact factor evaluation from Thompson Reuters. Looking at Google Scholar, we have about 1,150 citations with a constant monthly increase, so we are anticipating good news. We can only go up from here! We are eternally grateful to our readers who inspire us to present the important research from developing countries, without whom our accomplishments would not have been possible.

JIDC is based on the hard work of volunteers who believe in the JIDC project and give their time to achieve JIDC’s goal of reducing the scientific gap experienced by developing countries.

This is the right time to thank the editorial team including our senior editors, editors, associate editors and members of editorial board. We greatly appreciate the excellent work of our core team, including chief technical editor and production coordinator Nikki Kelvin, webmaster and production coordinator Marco Scano, page setter Joey Kelvin, creative director Jeff Coombs, and administrative assistant Giustina Casu.

Particular thanks go to our scientific editors Nadia Ahmad, Eve Boakes, Mark Cameron, Cheryl Cameron, Antigoni Chaideroglou, Marie Anne Chattaway, Daniela Chessa, Amber Farooqui, Katy Harker, Jorg Heukelbach, Richard C. Huard, Adnan Khan, Patrick J. Kelly, Gemma C Langridge, Asghar Nazeer, Alicia San José, Helena Seth-Smith, Chengming Wang, Aysegul Karahasan Yagci, and all the editors, reviewers, and board members who answered our call for science editors in October.

We are very grateful to our dedicated technical editors, Dominique China, Mark David Dickson, Emily Hiltz, Lisa M. Lambert, and Eva Molak.

Special thanks must be given as well to our senior editor, Aysegul Karahasan Yagci, who prepared our current special issue on tuberculosis.

Everyone on our editorial team is committed to our mentoring system, which is at the heart of JIDC, starting at the pre-submission level and carried through the entire publishing process.

We are also very proud of our successful blog, which is new to JIDC this past year. Headed masterfully and with a great dedication by Alyson Kelvin, it is a place where professional experiences
and scientific ideas can be exchanged. JIDC also has a Facebook page, where you can get updates on our editorial meetings and view our interesting gallery of JIDC friends, and we are followed on Twitter. We also publish a monthly newsletter that is sent to subscribers.

The financial burden of maintaining JIDC is shouldered by JIDC volunteers and grants and donations from foundations and organizations such as Fondazione Banco di Sardegna, Sardegna Ricerche, the University of Sassari, Shantou University Medical College, the Li Ka Shing Foundation, and the University Health Network in Toronto, Canada. Our heartfelt gratitude goes out to these people and organizations.

Finally, we are very grateful to all the reviewers who contribute their precious time helping with suggestions for revisions and ensuring that the journal maintains high professional standards. While our reviewers are from 65 countries from all over the world, most of them are from developing countries. We are fortunate to have reviewers from the following countries: Argentina, Australia, Austria, Bangladesh, Belgium, Brazil, Burkina Faso, Canada, Chile, China, Costa Rica, Croatia, Egypt, Ethiopia, France, Gabon, Gambia, Georgia, Germany, Greece, Hong Kong, India, Indonesia, Iran, Iraq, Italy, Kenya, Kuwait, Lebanon, Libya, Madagascar, Malaysia, Mexico, Morocco, Nepal, Netherlands, New Caledonia, New Zealand, Nigeria, Pakistan, Panama, Paraguay, Peru, Poland, Portugal, Russia, Saint Kitts and Nevis, Saudi Arabia, Syria, South Africa, Spain, Sudan, Taiwan, Tanzania, Thailand, Tunisia, Turkey, Uganda, United Kingdom, United Arab Emirates, Uruguay, United States, Venezuela, Vietnam, Zimbabwe.

We would like to acknowledge and thank the following 257 experts who reviewed the papers submitted for consideration in our 2011 volume:
